

## Access Mobile Web Banking

### What You Get

- Cardholder convenience
- Immediate access
- Fewer call center calls
- Improved customer service
- A differentiator for your organization

### Banking on the Go with Access Mobile Web

Today's consumers utilize their mobile phones throughout each day for a variety of services. With Access Mobile Web account holders have the convenience of banking whenever and wherever at their fingertips.

Access eliminates the need for creating and maintaining expensive device-specific applications. By intelligently detecting the user's device, Access renders the web page, tailored to fit that specific device. And Access doesn't require high-end "smart" phones. Any phone that can browse the web can utilize Access Mobile Web to perform a variety of convenient, user-friendly transactions.

Access also utilizes strong, two-factor authentication, and supports One-Time Password, Challenge/Response and Transaction Signing. An integrated, low-cost SMS-based One-Time Password is available, as well.

#### Supported Transactions:

- Inquiry
- Transfer
- History
- Payments to/from Credit card
- Bill Pay
- P2P
- Top Up
- Mobile Cash Withdrawal Transaction Staging
